

Artificial Intelligence Policy

Mission

Improve the quality of life of the community in which we are involved through the knowledge economy, creating a corporate culture focused on individual and social well-being, and carrying out our activities with passion, commitment, and excellence.

Vision

Be a leader in innovative, knowledge-based technology solutions, focused on generating highly profitable business with flexibility and adaptability for the energy market.

Attributes

- Innovation
- Excellence
- Expertise
- Integration

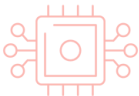

Through this Policy, BLC Global lays the foundation for its strategic direction, focusing on:

Promote the development of the skills needed by members of our community through training, ensuring the proper understanding and use of Artificial Intelligence Systems.

The organization commits to ensuring that all use of Artificial Intelligence respects essential ethical principles, protects privacy, ensures transparency, and guarantees that decisions derived from automated systems are always subject to human accountability and oversight.

Encourage the early identification of risks, the ongoing assessment of their impact, and the implementation of effective controls that seek to ensure the security, reliability, and use of Artificial Intelligence.

Ensure compliance with stakeholder requirements, applicable legal and regulatory requirements, and any commitments that BLC Global voluntarily undertakes.

Promote continuous improvement of our Artificial Intelligence Management System through a proactive approach that ensures it remains up to date and effective, and contributes positively to the people and communities involved

Carlos Cerrutti
President of BLC Global

Ignacio López
Vice President of BLC Global
